Presentation

EUROPEA is a network of over 1000 schools and institutions involved in agricultural (green) vocational education and training in Europe. From 2009 to 2011 EUROPEA has executed the project CHAVET that permitted to know about the challenges that agricultural (green) VET schools in Europe are facing. The new project named COPCHAVET "Coping with Challenges on Vocational Education and Training in Agriculture (green) Sector", of Leonardo da Vinci Partnership programme, runs from 2011 to 2013 and is going to find out good examples and practices in: 1- Cooperation school-enterprise and how to teach entrepreneurial competences, and 2- Good environmental farming practices and adaptation and mitigation to the Climate Change. Additionally it's going to elaborate a report about the implementation of the European Credit in Agricultural (green) Vocational Education and Training (ECVET) in some European countries.

EUROPEAN PROJECT

COPCHAVET

Coping with Challenges on Vocational Education and Training in Agriculture (green) Sector

EUROPEA
INTERNATIONAL

OBJECTIVES / ACTIVITIES

Objectives:

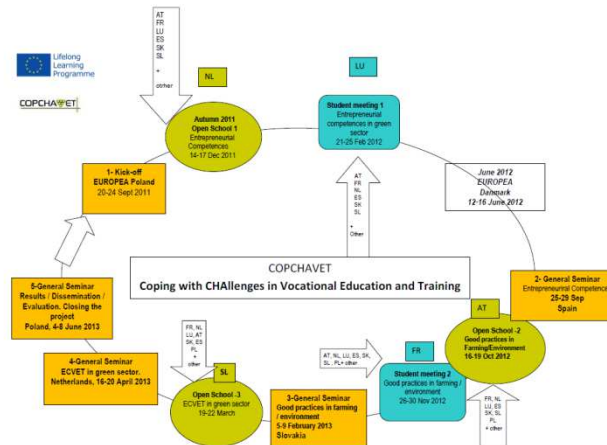

- 1- To enhance awareness among the European green (agricultural) VET schools and institutions about the new challenges related to:
 - a- Changes in farms and firms and the relationship school-enterprise
 - b- Environmental issues and Climate Change that affect farming
 - c- ECVET and the application in green (agricultural) sector
- 2- To improve knowledge, skills and competences of teachers and managers of green (agricultural) VET schools and other stakeholders of the trade about the challenges indicated above
- 3- To encourage innovative thinking and entrepreneurial behavior of students
- 4- To strengthen the cooperation among the partners (EUROPEA net)

Activities:

- 1-Phase: Dissemination of the results obtained in CHAVET project (green VET schools, Authorities,...).
- 2-Phase: Study / research of good examples in "Cooperation school-enterprise and how to teach entrepreneurial competences". Sharing and collecting information during some different meetings (Open School for experts and professionals, Student Meeting for students and Thematic Seminar for teachers and principals). To elaborate a "Repertoire".
- 3-Phase: the same as explained in phase 2 but for the "Good environmental farming techniques and how to cope with Climate Change in Agriculture". To elaborate a "Repertoire".
- 4-Phase: Study of the implementation of European Credit in agricultural (green) VET in some European countries. To elaborate a "Report".
- 5-Phase: Dissemination of all products and tools among European green VET schools and Authorities. Websites of EUROPEA-International (www.europea.org), and national ones. In Spain by the EUROPEA-España Website www.europeaespana.es and other ways of communication.

Evaluation during and at the end of the project (forms)

WORKPLAN / RESULTS

Results / products expected:

- European repertoire of good examples in cooperation school-enterprise
- European repertoire of good environmental farming practices
- Report about the implementation of European credit in agricultural (green) Vocational Education and Training (ECVET) in some countries
- Improvement the knowledge, skills and competences of the participants: teachers, students, professionals
- Implementation changes in schools (innovative thinking)
- Strengthening the EUROPEA partnership

ORGANIZATION / COORDINATION

At international level:

- Coordinator of the project: EUROPEA-España (ES)
- Official Partners: EUROPEA-AT, EUROPEA-FR, EUROPEA-LU, EUROPEA-NL, EUROPEA-SK, EUROPEA-SL, EUROPEA-PL

-Non Official Partners: The other national organizations of EUROPEA

At national level (Spain):

- Responsible: EUROPEA-E
- Coordinator: CFEA (Catalonia)
- Partners:
 - ECA d'Alfarràs / Servei de Formació Agrària (Catalonia)
 - ECA Tacoronte / Servicio de Formación (Canary Islands)
