

Europe is coming back to the Krems wine school

The final seminar of the Erasmus+ Digitalis project took place from 30th May to 3rd June. The chairman of EUROPEA Austria, Elisabeth Hönigsberger, was able to welcome students and teachers from 8 countries. Together with the Krems wine school, the schools LFS Mistelbach near Wels and LFS Gießhübl were also project members.

Project objectives were to improve the digital skills of teachers and students, to collect examples of good practice and to develop application examples. The importance of digital applications in everyday school life was shown three weeks after the start of the project in February 2020, when the Europe-wide lockdown began. Appropriate tools and apps were collected, which were not only described, but also integrated into lessons.

At the dissemination seminar on the 1st June, all participants were able to get to know the project products such as Digi-bites, guidelines and app descriptions. Entire learning units, e.g. digital bingo for plant learning, were tried out in the second year.

After many online seminars and work meetings, all project partners were able to enjoy the last day with a boat trip on the Danube and a hike to the ruin of Dürnstein, where they discovered the beauty of the Wachau.

Digitalis BOOK CREATOR

Digitalis partners at the Krems wine school from Austria, Germany, Estonia, Luxembourg, England, Poland, Spain and Ukraine.

In working sessions, students discussed their expectations of education and politics to be even better prepared for future challenges in the digital sector.

Erasmus+ is the EU program for the promotion of vocational training. It is the world's largest program for internships abroad and stays at universities. Its name is reminiscent of Erasmus of Rotterdam, a European-educated humanist of the Renaissance.

The one who specialises in a tidy way has already prepared a good part of the intertwined path behind him."
Erasmus of Rotterdam

Co-funded by the Erasmus+ Programme of the European Union

The project manager with Lukas Schoissengeyer (2. JG). European meetings remain unforgettable!

Students of the wine management course guided the guests through the wine school.
