Description:

- Free app for the identification of trees.

- Identify trees from their leaves, flowers, buds, twigs with clear images from trees.

- All native trees from America, Europe, Asia, Africa and Australia have been added

- Also, the A-Z tree list helps you to see all trees at once, compare them and learn about them.

- It is easy to find the history or locations and many information about the tree with Forest Tree Identification.

- All trees in your free application are updated every mouth. Please let us know about the tree if you think that it should be added or updated and help us improving your free tree application....

Evaluation from practical experience:

Easy to handle

Lots of information
