

ZOOM Cloud Meetings

Videoconferencing tool

School subject(s): Any...

Availability: Google Play Store (Android), Apple Store (iOS), Windows

Costs: Free; limits on meeting duration for larger groups. Limits removed during Coronavirus pandemic.

Usage: online, voice and video communication

Description:

- User friendly, easy to set up videoconferencing software
- Allows screen sharing as well as remote control for everyone
- Can be used to collaborate on documents and remotely support others
- Secure, with password access and the ability to add / remove participants.

Evaluation from practical experience:

- Easy to use – only requires basic computer skills
- Most students find Zoom communication as effective as face to face meetings
- Use a headset with a built-in microphone for better experience
-

Tips & tricks

Use a headset and encourage your participants to use one too, as this will significantly reduce background noise

In case of distortion or difficulties in hearing what others are saying, disabling video may improve the quality of the connection.
