

Creating bingo

Creating bingo with the web tool Bingo Baker

This guideline focuses on using Bingo Baker to create bingo games. Bingo Baker is a simple online tool. The created game can be played in two ways: on your computer or on printed worksheets.

It is not necessary to create a user account to create a game. When using web tool (Bingo Baker) without an account, you can only create public games that anyone can use. You can upload up to 30 images per day when creating games. You can create from one game a worksheet that can be printed for up to eight players.

There is a charge for creating an account (\$ 24.95). Account existence allows you to create an unlimited number of games, print an unlimited number of worksheets, play the game with an unlimited number of players, make the game private or set hidden mode. The account registration fee is a one-time fee.

Empty game view:

Game creation

1. Enter the title of the game.
2. Select a game size. Possible game sizes are 3x3, 4x4 and 5x5 squares.
3. Fill in the game squares.
4. Generate the game.

View after creating the game:

How to share a game?

The game can be shared with players via a link or as a printed worksheet.

When sharing with a link, a player can play the game on a computer or smart device. In addition, you can create a game embed in a website.

Website embed code

The screenshot shows a 'Share Your Bingo Card' window with a yellow border and a 'Close' button in the top right. The main heading is 'Share Your Bingo Card'. Below it, a text block says: 'You can use these URLs anywhere. Put them on your website, blog, or social media posts.'

There are four main sharing options, each with a text input field and a button:

- Share This Page:** The URL field contains 'https://bingobaker.com/view/3974382'. A purple arrow points to this field with the label 'Game link'.
- Share Play Online Page:** The URL field contains 'https://bingobaker.com#'. A purple arrow points to the 'Share' button with the label 'Link for online player'.
- Share Card Image:** The URL field contains 'https://bingobaker.'. A purple arrow points to the 'Download' button.
- Embed Play Online Page:** The code field contains '<iframe style="width:500px; height:300px; border:1px solid #ccc;" src="https://bingobaker.com/view/3974382" frameborder="0"></iframe>'. A purple arrow points to this field with the label 'Website embed code'.

On the right side of the window, there is a 4x4 bingo grid with the letters B, I, N, G at the top. The grid contains the following plants:

B	I	N	G
Viola arvensis	Rhododendron	Betula pendula	Viburnum Opulus
Campanula trachelium	Ranunculus	Syringa vulgaris	Thuja occidentalis
Campanula patula	Pinus sylvestris	Anemone hepatica	Urtica dioica
Quercus robur	Primula veris	Iris pseudacorus	Bellis perennis

At the bottom, there is an 'Attribution' section: 'Attribution: No attribution is required. But it's certainly appreciated if you link back to Bingo Baker. Here is link code you can use:'. Below this is a code field containing 'Bingo Baker' and a 'Copy' icon.

Playing the game

The created bingo game can be played either by filling out printed worksheets or on a computer.

Printable worksheets can be saved for up to eight players when using web tool without an account. Worksheets can be saved as a pdf file. The file consists of worksheets and a page for the game manager.

When **playing on a computer**, the game provider shares a link with the players (Share Play Online Page). When open a game on your device, players are shown a different game version. Specific squares are located differently on each player grid.

When using tool without an account, you can play online up to 30 players (players are shown up to 30 different grids/games).

The game organizer displays the squares that you bounce on your computer full screen. During the game player marks squares on grid in the order they are appearing on the computer screen by game operator/organizer. To do this, the player clicks on the square to be ticked. The game is won by the player who marks first all the squares in the grid first. The winners can also be the players who marked first four corners, two diagonals.

To play game on printed worksheets use the similar way- player need to mark squares in the grid on worksheet.

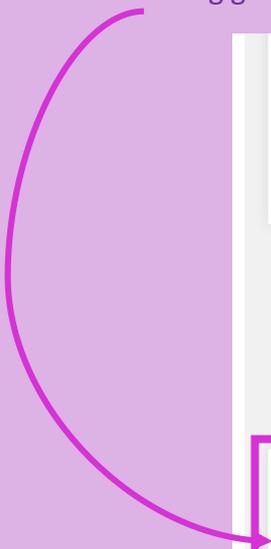

The four squares marked by the player:

20 most common park plants

B	I	N	G
Thuja occidentalis	Solidago	Primula veris	Bellis perennis
Picea abies	Hepatica nobilis	Anemone	Iris pseudacorus
Ranunculus	Verbascum thapsus	Betula pendula	Syringa vulgaris
Rhododendron	Campanula patula	Acer platanoides	Viola arvensis

Tips & tricks

If you want to create a game where not all players can fill all the squares by the end of the game, you need to add more (additional) squares than the selected game size (you can do it during game creation).

Ranunculus	Bellis perennis	Syringa vulgaris	Solidago
------------	-----------------	------------------	----------

Shuffle items *only* within their column
