

# Google Lens

## Search and translation tool

**School subject(s):** Any

**Availability:** Windows, Mac, Linux

**Costs:** Free

**Usage:** A powerful search and translation tool

### Description:

- Changes the way you search the Internet – no need to type!
- Simply point at an object and Lens will show associated search results
- Scan text on a piece of paper into a digital document easily
- Translate signs, objects, or images in real time

### Evaluation from practical experience:

- The tool is very powerful, and can help in several ways:
  - o Point at a plant, and animal or an object and Lens will identify it
  - o Travelling internationally? Point at signs for instant translation into your language
  - o Easily turn paper documents into digital copies

#### Tips & tricks

Need to translate a document in a language you don't understand? Lens will translate in real time (as tested by one of the Digitalis colleagues when reading a restaurant menu in Germany!)
