

# What's Blooming Here

Creating a Digital Herbarium

## Introductory Notes

- The teaching units should preferably held from April to June
- Duration for learning task: 100 - 150 min

## Digital Competences

- Selecting of suitable apps
- Checking information for accuracy
- Saving and using results
- Creating a digital presentation
- Shrinking image files
- Careful use of natural resources through the use of digital media

## Recommended Devices

- Plant Snap
- Picture This
- PPP, Prezzi, ...
- Resizing app

*Some examples, different layouts*

## Extra Benefit

The use of the proposed apps supports the recognition and learning of various wild plants. The creation of the digital herbarium conserves resources and prevents any protected plant from being picked.

## Recommended Devices

Plant Snap: Available for Android and IOS, limited use in free version

Picture This: Available for Android and IOS, unlimited images in free version

### Task 1

Photograph 12 flowering plants in your area. Use the app of your choice to determine the plant. Attention - several results can be presented, check by observing the location, flowering time.... which of the alternatives is the right one.

### Task 2

Create a presentation with your pictures (PPP, Prezzi, KeyNote).

Design the title slide and add your name.

Each slide represents a page of your herbarium. Information about location, demands, possible use, date of entry and recording is important.

### Summary

Students have fun searching and identifying plants. The herbarium can be easily presented and experiences shared.
