

Room Sketcher

Creating a floor plan

Assisted living is provided for people, who can live alone, but need some support.

You are planning a facility for assisted living. Your apartment has 50-70 square metres.

Recommended tool:

<https://www.roomsketcher.com/>

No web-based version anymore - you can download the app.

Task 1

Create a floor plan including bathroom/toilet, bedroom, living area (with kitchen and living room)

It should be

- * Barrier-free
- * Wheelchair-accessible (doors!)
- * Well-equipped and furnished

Task 2

Create a portfolio of your apartment.

Heading: Creating a floor plan for assisted living + your name

1. Insert a floor plan of your residential unit
2. Insert suitable pictures of your living areas
3. Describe the bathroom / toilet, bedroom and living area - explain how and why you designed them that way.
4. Which furniture did you choose, which materials, what did you pay particular attention to, what was important to you ...
